

# Cable Stripper

## Multi-Function

### MULTI-FUNCTION CABLE STRIPPER

The multi-function cable stripper allows all common round cables of between 4 and 28 millimetres in diameter to be stripped accurately, quickly and safely. The cutting depth of the blade can be regulated infinitely with the help of an adjustment wheel in the casing. This prevents damage to the inner wires. The blade is self-rotating and integrated into the casing, allowing automatic conversion from circular to longitudinal cutting. The additional wire stripping function has been integrated into the casing and allows all common flexible and solid conductors with a cross section of between 0.5 and 6 mm² to be stripped quickly and efficiently. All blades are made from a special high tensile sharpened steel for extremely long life.

SPECIFICATIONS	TWSM01
<b>Suitable cable type</b> External Internal	Round Solid, stranded or braided with PVC insulation
<b>Mutli-funtion stripping</b> External Internal	0.4 – 28 mm 0.5 – 0.6 mm²
<b>Inner blade</b>	Adjustable and replaceable
<b>Approvals/certificates</b>	Safety tested by TÜV NORD
<b>Material</b>	Glass fibre reinforced Polyamide
<b>Length</b>	145 mm
<b>Weight</b>	61 g
<b>Country of origin</b>	Germany

## Instructions for Use

STEP  
**1**

Adjust blade to external sheath depth using red finger wheel.

STEP  
**2**

Lift spring loaded cable retainer using thumb and insert cable.

STEP  
**3**

Turn stripper around cable circumference through 2-3 rotations.

STEP  
**4**

Slide stripper along cable length and peel off external sheath.

STEP  
**5**

Use thumb to open spring loaded stripping tool and insert wire into appropriate stripping slot.

STEP  
**6**

Release thumb to close stripping tool and slide to expose internal wire.
