

Medical Flowmeters & Accessories

FLOWMETERS

FM Series

The FM Series Flowmeters are a slim body flowmeter with a matte finish designed for medical applications. The units are back pressure compensated and include a pressure relief valve to protect against overpressure. The outlet is 1/4" BSP with a standard hose nipple with gas specific colouring as per AS 3840.1. The FM series flowmeters are TGA listed and comply with the requirements of AS 3840.1 and AS 2896.

FEATURES

- Slim line design
- Chrome plated body
- Safety relief valve
- SIS inlet
- Gas specific hose barb

SPECIFICATIONS

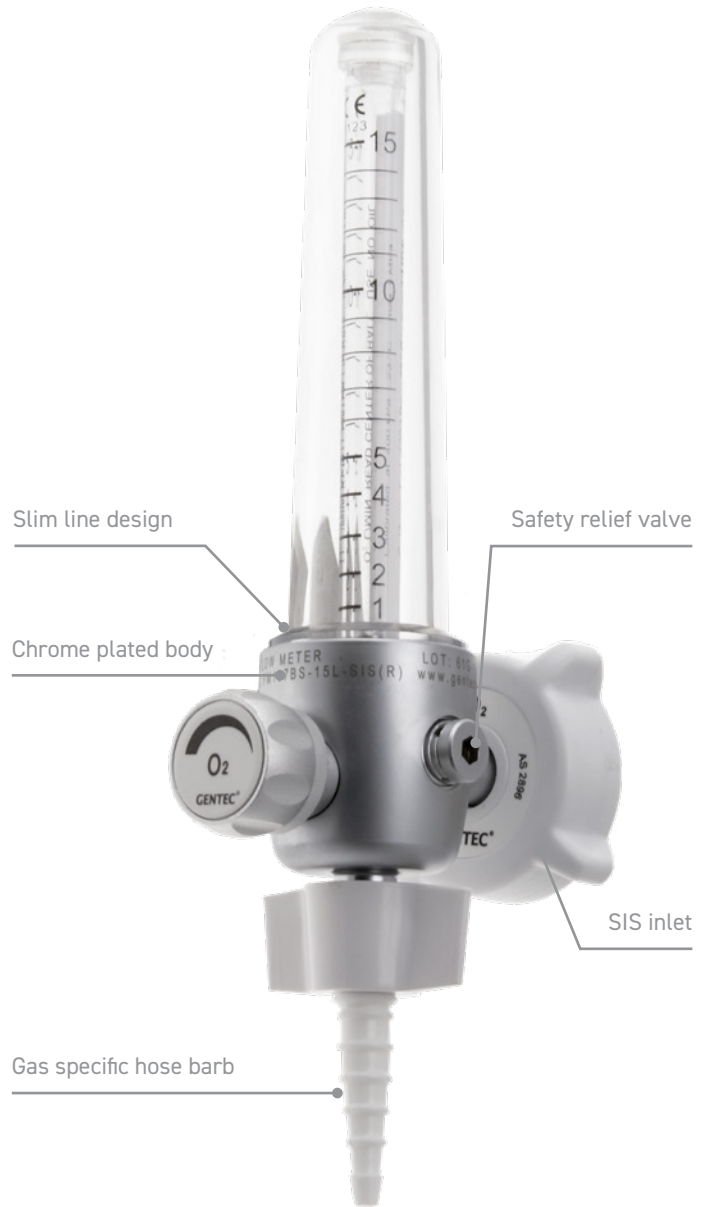

Maximum flowrate	15 L/min
Outlet fitting	1/4" BSP male
Calibration pressure	400 kPa

PART NO	DESCRIPTION
FM187BS-15L-SIS(R)	Flowmeter Medical Air with inline control knob
FM187BS-15L-SISR	Flowmeter Medical Air with inline control knob, restrictor
FM197BS-15L-SISR	Flowmeter Medical Oxygen with inline control knob, restrictor

HOSE BARBS

Tesuco® hose barbs are designed to compliment their flowmeter counterparts. White hose barbs are suitable for oxygen flowmeters, while our black hose barbs are for air flowmeters. Each pack consists of 10 units.

PART NO	DESCRIPTION
G204302400	Oxygen, white
G204302404	Air, black

Medical Flowmeters & Accessories
