

Tesuco® Flame Pro® goggles are designed and approved for use in all gas welding applications that require a shade 5 lens. This includes, welding, brazing, heating, gouging and cutting applications.

The goggles have a flip up design, which can be operated using one hand to reveal a clear lens for viewing the operation before or after the work is completed.

The goggles are designed to give protection to the eyes against lower levels of radiation in gas welding applications and any flying particles when grinding.

FEATURES

- Designed to fit over prescription glasses or safety spectacles
- The frame design enables a better fit to different contours of the face.
- Four indirect vents to prevent fogging

SPECIFICATIONS

Product certification has been issued by SAI Global to meet the following standards:

AS/NZS 1337.1:2010 Personal eye protection – Eye and face protectors for occupational applications.

AS/NZS 1338.1:2012 Filters for eye protectors – Filters for protection against radiation generated in welding and allied operations

Conforms to CE EN175 and ANSI Z87.1 standards

The soft PVC material used is environmentally friendly and complies with international regulations such as REACH SVHC/California Proposition 65/TSCA/POPs and will not cause irritation to the skin.

Flip Up Design

To ensure the long life of the goggles, spare lenses are available in pairs:

*GWGS5
For shade 5 glass lens*

*GWGCL
For the clear polycarbonate lens*
