QUALITY GAS EQUIPMENT

tesuco.com.au

Our name Tesuco® comes from **Te**chnical **Su**pplies **Co**mpany.

We Thank You For Choosing Our Quality Gas Equipment

Beginning in 1988, Tesuco® has established itself as a specialist equipment supplier for all gas welding, heating and cutting applications. Tesuco® is proud to be 100% Australian owned and has been quality endorsed by SAI Global to the AS/NZS ISO 9001 Standard since 1995.

Tesuco® continues to introduce new and exciting products from the best Australian and overseas manufacturers. This booklet introduces you to our range of welding, heating and cutting equipment, available through our extensive distributor network both here and abroad.

Tesuco® is sole distributor for GENTEC range of Medical gas equipment throughout Australia and the Pacific. GENTEC manufactures a wide range of gas equipment for all medical applications across oxygen therapy, respiratory gas equipment, suction equipment, bedhead systems, alarms and pipeline products. GENTEC is ISO9001 accredited and the medical range of products are CE marked and manufactured to rigorous International Standards in a large modern ISO 13485 facility.

Tesuco® ensures that all medical products meet the relevant Australian Standards or accepted alternative International standards and all medical gas equipment in the Tesuco® range are listed on the ARTG. Copies of certificates can be supplied upon request.

ℹ️ Only trained operators may use this equipment.

197M-940-YSC

197M-965-YSC

Meets AS 3840.1

STANDARD

The 197M regulators are fabricated of high-quality brass and have a Matte Chrome body. Key features include, adjustable yoke system, easy to read pressure gauge made to AS 4706, Self-Sealing outlet makes sure no gas will flow until the flowmeter is connected. Pin index yoke 'T' screw includes a clip to prevent it from being removed completely. Regulator comes with a manual and a one year warranty against manufacturers deflect. The 197M Regulators are listed on the Australian Register of Therapeutic Goods (ARTG).

VARIABLE THERAPY REGULATORS
Click Style

These click flow regulators are manufactured with a chrome plated brass body, with brass chamber. These Regulators are listed on the Australian Register of Therapeutic Goods, comply with all relevant Australian Standards*, and have passed the oxygen flammability test.

*Note: Flow tolerances required by AS 3840 are such that at 1/32 and 1/16 Lpm the tolerances are lower than the repeatability achievable between different test equipment or operators.

OXYGEN SUPPLY MANIFOLD

The DST oxygen supply manifold is designed for EMS and mass casualty situations where multiple patients require oxygen simultaneously. The unit can be connected to wall outlets, or cylinders for portability and provide consistent pressure with individually selectable flow rates. The unit is available in 5, 7 or 9 flowmeter models. The supply hose provided is 3 m but can be varied to customer requirements.

The units are manufactured according to CE requirements and are compliant to EN 13220.

HUMIDIFIER

The 7200R-OA Humidifier is reusable humidifier consisting of a polycarbonate bottle providing impact resistance for maximum durability and service life with an optimum volume of 140 ml. The device is designed to be autoclavable up to 121°C during disinfecting procedures and includes a pressure relief valve on the cover to vent excess pressure. The humidifier is fitted with the standardised Australian flowmeter inlet connection for connection to a standard flowmeter outlet, and has a hose barb outlet for respiratory tubing connection.

SPECIFICATIONS	7200R-OA
Materials	Matt chrome and polyarbonate

MEDICAL GAS OUTLETS

Tesuco's medical gas outlets have been designed by Gentec specifically for the Australian Market. These outlets have been designed based on the requirements of AS 2896, feedback from users and existing products in the market."

FEATURES

- Medical gas self-sealing outlets.
- Indexed ring system allowing connection of SIS connectors complies with Australian Standard AS 2896.
- Gas specific terminal units with non-interchangeable threaded connections compliant with AS 2902.
- High flow capacity.
- Robust design to withstand arduous use.
- Unique gas specific diameter indexing system prevents. Incorrect assembly of units on installation or when dismantled for maintenance.
- Laser engraved gas identification on the unit body, to provide gas identification when the unit is disassembled.
- Annealed copper tails, to assist in installation.
- Instruction manual provided with unit.
- Servicing is required as part of AS 2896 Full replacement parts are available.
- 12 Month warranty against manufacturers defect.

882VR SERIES SUCTION REGULATOR

The 882VR suction regulator is a continuous suction regulator suited for surgical applications. The casing is made of ABS for long durability, impact resistant internal parts, corrosion free and lightweight. The device contains few internal parts for ease of maintenance. The device includes a clearly labelled gauge, a mode selector switch, a control knob for adjusting the suction level and a suction trap to prevent contamination caused by overflow. The device is easy to clean down or wipe with sterilant. The device complies with AS 2120.3 and is listed on the Australian Register of Therapeutic Goods (ARTG).

SPECIFICATIONS	882VR-760E-SIS-T
Regulated suction range	0-760 mm Hg
Gauge display range	0-760 mm Hg
Gauge accuracy	+/- 4%
Scale orientation	Counter clockwise
Mode selection	Off/Continuous/Full
Flowrate	>70 L/min
Suction trap	Included

POWER-VAC SERIES

Power-Vac Series is a venturi actuated suction device which features two power take-off connectors for connecting oxygen sources. It can be used in hospital treatments, other device gas supply, life support, and any circumstances where patients require the assistant of oxygen or suction therapy. This device can be used repeatedly. The device can be connected to a central oxygen pipeline outlet or cylinder regulator with a pre-set outlet pressure.

SAFETY FEATURES

- Positive pressure relief valve
- Safety trap with hose barb connection

SPECIFICATIONS	880VC-760-SIS-T
Gas supply	Oxygen
Inlet pressure (p_1)	400 kPa
Inlet connection	SIS Handwheel
Outlet connection Oxygen Suction	 SIS Sleeve Hosebarb
Negative pressure at max setting	550 mmHg
Generated vacuum flowrate	⩾25 L/min
Gas consumption	22 L/min @300 mmHg

ATLAS ALARM

ATLAS area alarm actively displays your medical gas information on a highly visible 10" TFT LCD screen. It is capable of handling up to 8 gases, 14 relay inputs, 7 relay outputs and 2 analog outputs in one alarm covering all needs of hospital alarm and monitoring needs.

FEATURES

- On-site customisation without the use of a laptop, tablet, or mobile device. Settings such as brightness, pressure, hysteresis, silence time, communication parameters, and high and low alarm conditions can be adjusted.
- 10" Touch screen display with password protected interface.
- Can be used as an area alarm, master or combination alarm.
- Full networking capabilities out of the box including Modbus RTU/TCP, UDP protocols.
- Can be integrated with SCADA system or BMS systems.
- Transducers can be mounted locally or remotely utilizing shielded twisted pair wiring up to 30.5 m.
- Gas specific DISS fitting to ensure that the transducer is connected to its corresponding gas.
- Circuitry protection and detection, if the transducer is not connected at all or not to the appropriate gas display, an error message ("No Sensors") will be displayed.
- The alarm system allows users to have optional relay outputs according to single or multiple alarm conditions.
- Event Log to view history of
