**FOR THE PRETREATMENT OF BONDING SURFACES**

Weicon Surface Cleaner is used for the cleaning and degreasing of surfaces to be joined or sealed with Weicon Adhesives and Sealants. Surface Cleaner can be used on materials like metal, glass, ceramics and most plastics, and evaporates without residues. Check surface compatibility prior to use. Weicon Surface Cleaner can also be used to clean and degrease machine components in the course of maintenance works.

**PROCESSING**

1. Shake can before use. Surfaces must be dry and free of grease and debris. Spray on one surface at about 15 to 30 cm distance. With porous materials, Adhesive Spray should be applied on both surfaces.
2. Depending on surface characteristics and ambient temperature, let the spray dry (approx. 10 minutes) until the adhesive is no longer stringy.
3. Position the parts and join them with strong pressure.

**STORAGE**

Pressurized container. Protect from direct sunlight and temperatures above +50°C.
