

HAND SCARFER SCARFER

Hand scarfers from AMT Gega bear the designation MST and SHF. The latest version of the hand scarfer, the MST variant, impresses with its light construction and thusly improved ergonomics. By integrating the scarf oxygen valve into the heating medium regulator, improved handling is achieved. The SHF is a heavy design and distinguishes itself with various safety applications. A shield is installed, which protects the user from hazardous flame.

Combined with the flaming nozzle HFD 1F, this equipment makes an impressive manual component, scarfing efficiently at a high level. Experience a particularly wide scarfing track with very good ergonomics in this particular setup.

All AMT Gega hand scarfing torches are fitted with an automatic ignition wire feed rate, enhancing the ignition behaviour of the scarfer significantly.
