

# MACHINE SCARFER SCARFER

The ranges MH and MHD are large-scale scarfing burners of the AMT group. The sophisticated technology inside enables a high finish quality for the scarfing process.

With the help of the machine scarfer, finish errors such as heat cracks or shrinkage cavities are eliminated. Due to the high AMT Gega standard with regards to choice of materials and manufacturing precision, a stable process is achieved in the surface removal, with long service lives.

For better interchangeability of components with a high thermal load, the entire unit has a modular structure. Various widths of scarfers are available, so that an individually customised solution can be offered.

Available on request.
