

CORTI MOBILE EQUIPMENT

AMT Gega also offers a portable flame cutting machine. The AMT Gega Corti offers a high level of flexibility with regards to its area of use. The light and robust aluminium casing offers the perfect housing for the speed controller, operated via a potentiometer.

Cutting is carried out by AMT Gega flame cutters in the SB range, tried and tested over many years. These were optimised to be adapted to the requirements of a compact cutting system.

The Corti is guided by a special aluminium rail, which is divided into sections with a maximum length of 6 metres.
