

GASKET REPAIR SET

ADDITIONAL EQUIPMENT

Several repair kits and gasket sets have been compiled for the maintenance of AMT Gega regulating units. The range starts with a basic set and goes right up to specially compiled sets for the various construction stages.

The scope of delivery includes seals and mechanically strained wearing components.

The components of the gasket set include special seals for the regulator type and a suitable O-ring set.

Please get in touch with our Life Cycle Management team to discuss maintenance by Gega specialists on site.

SERVICE KIT
